1 Valve Core Screw Driver double ended (VG5/Caps)

Weight : 35gms Code No.: 330001

Use : Removing & fixing valve cores in cars and trucks. Large and standard bore.

Material : Carbon steel and plastic handle.

2 Valve Core Screw Driver standard single ended

Weight : 25gms Code No. : 330002

Use : Removing & fixing valve cores.

Material : Carbon steel and plastic handle.

3 Valve Core Screw Driver double ended (VG5/VG8)

Weight : 35gms Code No. 3300012

Use : Removing & fixing valve cores, VG5 from one end and VG8 from the other end.

Material : Carbon steel and plastic handle.

4 Valve Core Screw Driver standard single ended 1" stem length

Weight : 20gms Code No. : 3300014

Use : Removing & fixing valve VG5.

Material : Carbon steel and plastic handle.

5 Valve Core Screw Driver standard single ended 1.5" stem length

Weight : 20gms Code No. : 3300114

Use : Removing & fixing valve core VG5.

Material : Carbon steel and plastic handle.

Finish : All metal parts are nickel chrome plated.

6 Valve Core Screw Driver standard single ended 4" stem length

Weight : 30gms Code No. : 3300214

Use : Removing & fixing valve cores VG5 from remote distance

Material : Carbon steel and plastic handle.

7 Valve Core Screw Driver (VG5/VG8)

Code No. : 3300314

Weight : 35gms

8 Valve Core Screw Driver 2" Stem Length with Torque

Code No. : 3300414

Weight : 40gms

pre-set tightening torque 0.40 N.m.

9 Valve Core Screw Driver Plastic

Code No. : 3300315

Weight : 3gms

Use : Removing and fixing valve core.

Material : Nylon

10 Cable Type Valve fishing Tool

Code No. : 3300015

Length : 215 mm

Weight : 35gms

Use : Tool for easy valve installation in tubeless tyres.

Material : Carbon steel.

11 Rigid Plastic extensions

- 12 Ventifix Plastic** **Code No. : 330003**
Weight : 75gms
Use : Mounting rubber snap-in valves on passenger cars. Protects light metal alloy rims from scratch.
Material : Made out of poly amide-6 for imparting super bending strength to the lever.
Finish : All metal parts are nickel chrome plated.
-
- 13 Ventifix Plastic with Revolving Nozzle** **Code No. : 330043**
Weight : 85gms
Use : For removing tubeless motorcycle valves.
-
- 14 Ventifix Plastic with cap** **Code No. : 330053**
Weight : 90gms
Use : For mounting valves with cap. The valve cap no longer has to be screwed/unscrewed again.
-
- 15 Ventifix Steel** **Code No. : 330004**
Weight : 300gms
Use : Ruggedly constructed steel tool is designed to provide sure grip and leverage necessary for positioning seating or removal of snap-in type valves. Deep thread head assures ease of valve stem attachment. Nickel chrome plated to prevent erosion.
Material : Carbon steel.
-
- 16 Ventifix Steel** **Code No. : 330024**
Weight : 150gms
Use : Mounting rubber snap in valves on passenger cars.
Material: Steel sheet.
-
- 17 Ventifix Plastic (Heavy Duty)**

Colour	Weight	Code No.
Red	95gms	330023
Black	95gms	3300123

Use : Mounting rubber snap-in valves on passenger cars, and to open valve core screw.
Material : Made out of polyamide-6
-
- 18 Tubeless Tyre Valve Installation Tool Push Type** **Code No. 330063**
Weight : 470gms
Material : Special Steel
-
- 19 Valve Extension Holder-Double Strip Type (8mm)** **Code No. : 330007**
Weight : 35gms
Material : Carbon steel and spring steel wires.
Finish : Zinc plated **Colour** Golden.
-
- 20 Valve Extension Holder-Double Clip Type (16mm)** **Code No. : 330008**
Weight : 60gms
Material : Carbon steel and spring steel wires
Finish : Zinc plated **Colour** Golden
-
- 21 Valve Extension Holder-Single Clip Type (16mm)** **Code No. : 330009**
Weight : 55gms
Material : Carbon steel and spring steel wires
Finish : Zinc plated **Colour :** Golden
-
- 22 Valve Extension Holder (26mm)** **Code No. : 330029**
Weight : 60gms
Material : Carbon steel and spring steel wire
Finish : Zinc plated **Colour :** Golden

23 Valve Core Screw Drivers

Material : Carbon steel with aluminium handle.

Size	Weight	Code No.
1"	15gms	3300021
2"	40gms	3300061
4"	42gms	3300041
5"	45gms	3300051
10"	60gms	3300101

24 Valve Core Screw Driver Flexible

Size	Weight	Code No.
6"	46gms	3300611
8"	60gms	3300011
10"	65gms	3301011

Use : This valve core screw driver holds the valve core with a clip. Also the fitting/ removing of valve cores is much easier.

Material : Carbon steel and flexible steel wire rope with aluminium handle.

25 Valve Core Screw Driver For OTR Tyres Code No. : 3300441

Size : 4" **Weight** : 100gms

Material : Carbon steel with aluminium handle.

26 Valve Core Screw Driver with Magnet Code No. : 3300541

Size : 4" **Weight** : 45gms

Material : Carbon steel with aluminium handle.

27 Tubeless Valve Stem Puller Code No. : 330006

Weight : 150gms

Use : Installs and removes tubeless valves in seconds and protects the expensive alloy rim from scratch.

Material : Aluminium handle with PVC coating for hand protection.

28 Tubeless Valve Stem Puller Code No. : 330026

Weight : 265gms

Use : Installs and removes tubeless valve in seconds and does not scratch the expensive light metal alloy wheels.

Material : Steel handle with PVC coating for hand protection.

29 Tubeless Valve Stem Puller Code No. : 330036

Weight : 310gms

30 Heavy Duty Valve Puller Code No. : 3300018

Weight : 400gms

Use : Heavy Duty Pull a Stem Tool to pull old or insert new tubeless rubber valve of all sizes.

Material : Made out of carbon steel strip.

Finish : Nickel/Zinc plated to prevent rusting.

31 Heavy Duty 4 Way Valve Core Repair Tool

Material	Finish	Weight	Code No.
Carbon Steel	Auto Black	25gms	3300115
Special Steel	Zinc Plated	20gms	3300116

Use : Repairs and reconditions inside and outside valve threads and removes broken cores.
